**RE: Richard Keleher Architect
Construction Document Review Services**

Mr. Keleher has recently provided construction documents review services for our office. We were very pleased with his thorough, professional, and helpful review.

Mr. Keleher's review was a valuable check on the completeness and accuracy of our drawings and specifications. He offered helpful suggestions on tricky details, and ideas for improving the clarity and consistency of our drawings and specifications.

I have found Mr. Keleher to be a very knowledgeable architect and am impressed with his understanding of construction and detailing issues. I am confident that we produced a better set of construction documents, because of Mr. Keleher's input. We plan to use his services again and would not hesitate to recommend him to others.

Sincerely

J. Stewart Roberts, AIA
